## Ultimate Profits Finder

Dear Trader,

Thanks very much for your interest in Ultimate Profits Finder course.

This system is a small gift for us to say thank you. This system has nothing to do with the course. We just want to let you know that we care for your trading success.

So feel free to use this free but cool system.

I hope you like it .

***Albert Nicholas,***

## INTRODUCTION

This indicator uses some of the most powerful indicators such as the RSI as well as other types of calculations to determine the trend and momentum of the pairs. This indicator gives you the current situation of the pair you put it on and let you know whether we are in a bull or bear situation. Although this indicator can be used standalone, it is advised that you use other confirming indicators together with it.

The Indicator Parameters are as follows:

RSI\_Period (default = 13)

the period in bars for calculation of RSI.

RSI\_Price (default = MODE\_CLOSE)

the price type to use in RSI calculation.

Volatility\_Band (default = 34)

the parameter for volatility band calculation. (Can be between 20 and 40. The lower this value is the curvier becomes the band.)

RSI\_Price\_Line (default = 2)

the period of the first moving average (fast).

RSI\_Price\_Type (default = MODE\_SMA)

the type of the first moving average.

Trade\_Signal\_Line (default = 7)

the period of the second moving average (slow).

Trade\_Signal\_Type (default = MODE\_SMA)

the type of the second moving average.

UseAlerts (default = false)

if true then sound alert will be played each time red and yellow lines cross.

### When to Buy

You can open a BUY position when the following happens:

1. Green line is above red line
2. Both Green and Red line are above Yellow line
3. Yellow line is above 50 (Optional for long term/Must for short-term)

### When to Sell

You can open a SELL position when the following happens:

1. Red line is above Green line
2. Both Red and Green lines are below Yellow line
3. Yellow line is below 50 (Optional for long term/Must for short-term)

## Ultimate Profits Finder

### When NOT to enter a trade

1. Do not enter a trade when the Green/Red lines are outside the Blue Line or very near to it... try to

enter the trades as close to the Yellow line as possible.

2. Do not enter trade when the Blue lines (bands) are too narrow as it shows little volatility in the

market.
