Please all and any new product try and test on a demo account first. Wishing you safe and profitable trading.

**Yours,
Rita Lasker**

Description

Better Volume 1.4 is currently the representative of the family of modern indicators. Using this forex indicator, you can track the volume and follow the timely analysis of various trends in the market. This indicator's performance is simple: you need only to follow the pattern in which the indicator colors columns at a given time. This color will characterize the current market situation.

How to read it:

Red color. It means that the volume on the market is high and also it shows an upward candle with a large range. It takes place at the beginning and at the end of the ascending trend, as well as during a downward correction in the market.

White color. It is associated with high volume and downward candle with a large range. It performs like a mirror with respect to red: signal that color exists in the beginning and at the end of a downtrend. It can also be observed during the growing market correction.

Green. The large volume of the candle with a small range. Columns have the color of

the indicator at the end of trend movements in the market, as well as profit-taking in the middle of the trend (correction).

Purple color. A large amount of candles on the group with low to high range. This color can be observed very rarely. Is most often seen during the correction.

Yellow colour. It characterizes candles with a small tick volume. The indicator is yellow at the end of the trend during corrections.

In the absence of signal, the indicator draws **blue** columns with volume parameter.

Installation

1. Start MetaTrader4.

Select **File** in the menu, **Open Data Folder**. A new window will open:

Open **MQL4** folder. Here you will find **Indicators** folder.

Copy **BetterVolume 1.4.ex4** inside **Indicators** folder.

2. Close MetaTrader and start it again.

Now you may find it under Custom Indicators in Navigator. Open any chart and timeframe. Right-click on its name in Navigator and select Attach to a chart. Wait for few seconds for information to be displayed at your chart.

You may use it at ANY timeframe.

If you have any questions, please feel free to ask our support team by sending an E-mail to: ritalasker@gmail.com We will do our best to help you.
