Fat Cat Forex Scalper

Forex scalping is a popular currency trading strategy used on short time frames, such as 1 to 5 minute charts, with quick buy/sell transactions that extract between 2 to 15 pips from the session.

These quick transactions are often executed with larger lot sizes so that the smaller amounts of pips scalped will still lead to high profit margins. Potentially, scalpers can make high profits quickly.

By increasing the per pip value, with just a few pips, scalpers can exit the market with similar profit margins as more conservative traders. It is easier and quicker for the market to move 5 pips in the positive, than it is for the market to move 150 pips in your favor.

- It works on all MT4 brokers.
- Works on 4 and 5 digits brokers.
- Works with different instruments and timeframes.
- With sound and popup alert.
- Very simple rules.

The **Fat Cat Forex Scalper** indicator is one of the easiest and most profitable scalper indicators of the market.

The rule is simple and easy: **BUY** if a new green Fat Cat Arrow appears, **SELL** if a new red Fat Cat Arrow appears.

Furthermore, it comes with **SOUND** and popup message **ALERT** too, so you will never miss any opportunities.

Start to earn many quick pips with the amazing Fat Cat Forex Scalper indicator.

Buy it today and start to use even tomorrow!

Congratulations on your purchase!

You have made the best decision, as the Fat Cat Forex Scalper is one of the most effective entry signal indicators on the market.

Installation

Step 1 – Download and install the Metatrader4 (MT4) platform. You can choose any broker that supports Metatrader4 platform such as Alpari, InterbankFX, FXDD, FXPro etc. Feel free to use your existing brokerage account or choose one by yourself.

Step 2 – Copy the FatCat.ex4 file to your Metatrader indicators folder (C:\Program Files\MetaTrader– your broker\experts\indicators).

Step 3 – Open your Metatrader4.

Step 4 - On the Navigator panel of your Metatrader choose Custom Indicators> FatCat, and add it to you chart(s).

Now the Fat Cat Forex Scalper should be running. You only have to wait till a Fat Cat arrow appears (also a sound and popup alert will notice you) and then trade in the direction of the arrow. The Fat Cat arrows are round and fat like the Fat Cat, so they are extremely visible and fits well on the charts.

We designed and tested the Fat Cat Forex Scalper for the M1 timeframe which is the favourite timeframe of most scalpers. However we also found it very profitable on the higher timeframes, as M30 and above.

Let's see some exact chart examples. Please keep in mind, that the Fat Cat Forex Scalper doesn't repaint!

Finally, let's check how the Fat Cat Forex Scalper works on higher timeframes, like the **H4 timeframe**:

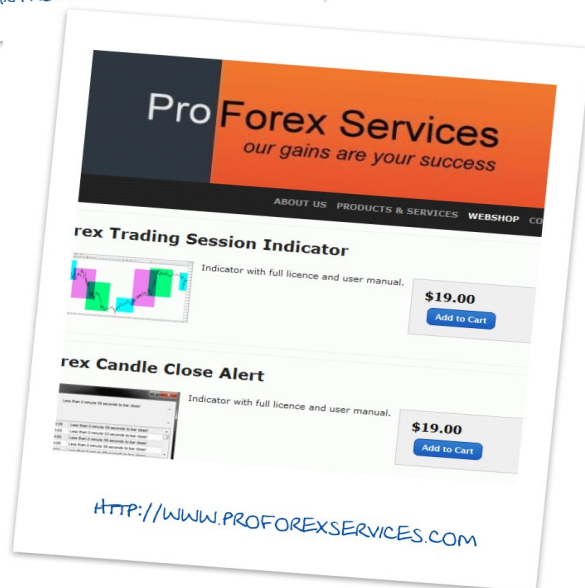

Please feel free to use the Fat Cat Forex Scalper with your own money management rules or trading system. The Fat Cat indicator signals potential entry points extremely well, but the key of successful trading is the proper money management.

Wishing you successful and profitable trading with the Fat Cat Forex Scalper.
