

Sufi's System No.3

Firstly, I just want you to know that this system has changed a little. The DT LAUER ZIGZAG has been substitute to the NONLAGZIGZAG_V2 and same with the settings.

NONLAGZIGZAG_V2: Default

HIGH_LOW V2 (ZIGZAG): Barn 300, Length 7

xpMA_v2SATL: Default

Template included.

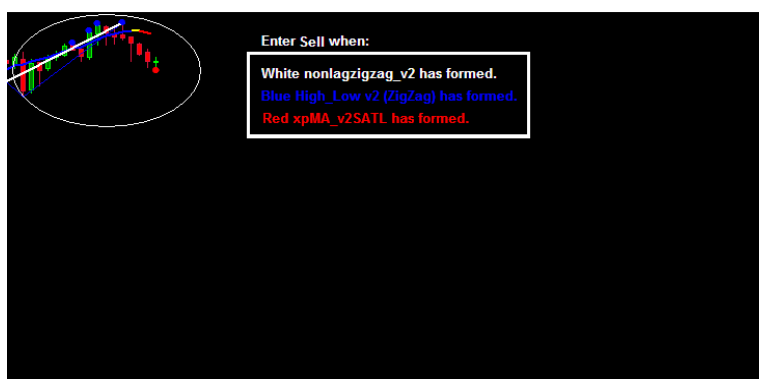

This system can be use on any TF with any CURRENCY.

Below is the ENTER and EXIT rules for the system.

BUY RULES:

SELL RULES:

If you still couldn't understand the system rules. Try it on a 1M TF and see what I mean. Take time to master this system, and you will notice that it is a very profitable system.

Sometimes, the definite EXIT of this system may be quite confusing, for that I recommended you to apply S/L and T/P for this system in median rate. How to count it? Alright then, see the calculation below.

Count for at least 30 high and low on the High_Low v2 (ZigZag) and add it all. After that, divide the sum of the pips by 30 and you'll get the median rate for T/P, for S/L just subtract 7 to 25 from the T/P median rate.

Example of median rate calculation:

$$10 + 20 + 30 + 60 + 10 + 15 + 25 + 35 + 70 + 40 + 30 + 100 + 45 + 50 + 10 + 5 + 20 + 40 + 10 + 30 + 60 + 10 + 15 + 25 + 35 + 70 + 40 + 30 + 100 + 45 = 1085 / 30 = \text{T/P } 36 \text{ pips} - 20 = \text{S/L } 16$$
