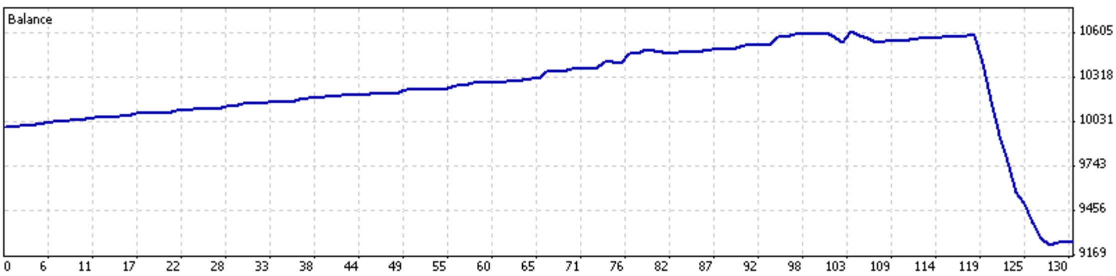
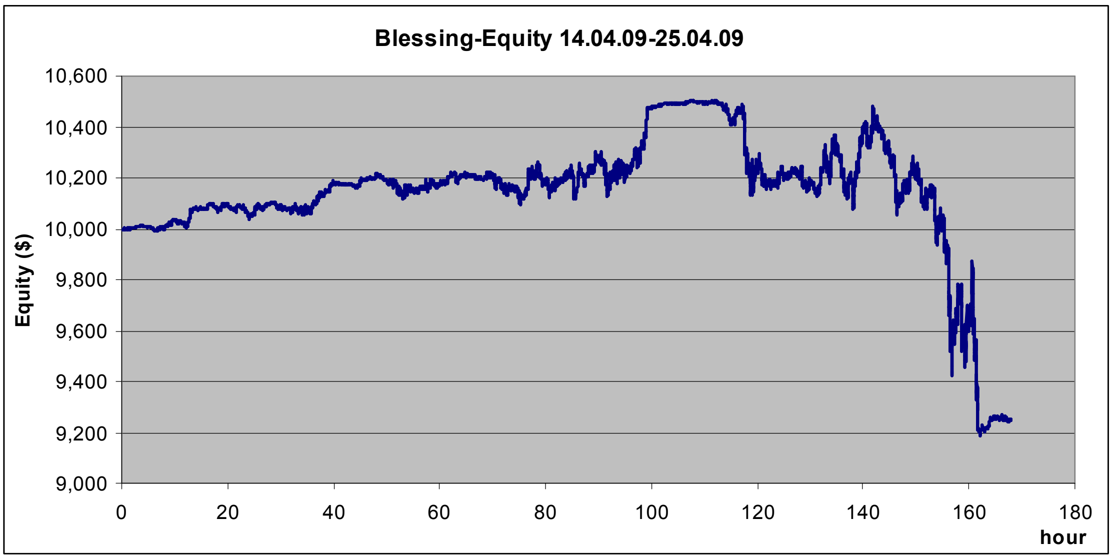
Average	consecutive wins:	5	consecutive losses:	2	

Table 1: Summary of the account history



Graph 1: Balance curve since start



Graph 2: Equity curve (1 min data)

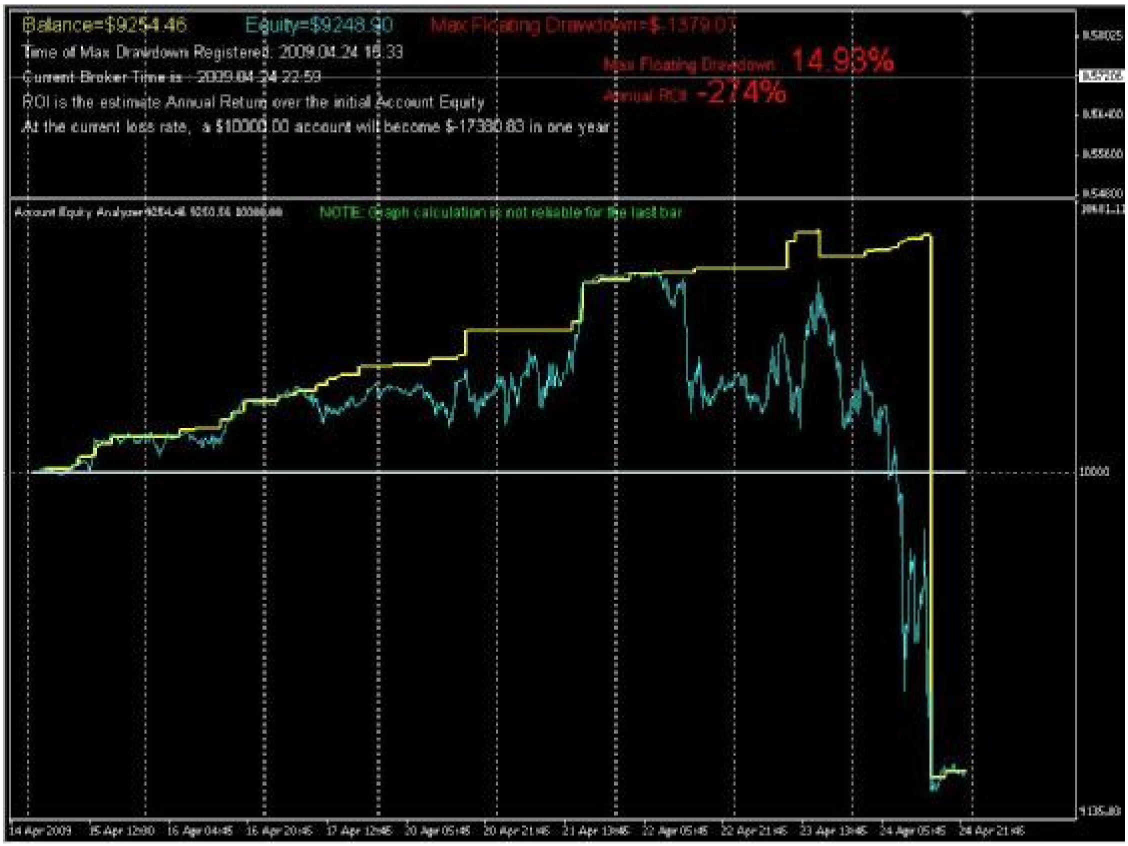


Image 1: Screen print of the Account Equity Analyzer

For this time period Blessing 2 v5.0 was used, only at the last hours it was changed to v5.1

Remarks:

The problem was caused by EURUSD. Since the daily average of EURUSD is compared to the three other pairs about 1.6 times higher it should be considered to change the grid range, either automatically or manually. I will make some tests.

By the way, the AutoCal was switched off during the above tested period because when I optimized the settings the results were always better without AutoCal.
