

1 week performance – ok

1month performance (RAS chart below) barely satisfactory. If it wasn't for a mistake I made with Gbp/Jpy, we would've had a very profitable and nice February. Oh well, as long as you realize and admit to mistakes, you can always learn from them..

90 days chart. – I’m very happy with overall performance of RDB&RTL. As long as equity curve looks like this chart below and inching upward, we’re smiling all the way to the bank at the end of the year.
