ISAKASv2 REBIRTH

TRENDING AND RANGING

BBANDS_STOPS

Thats important for us to know the market situation. Which one is trending or ranging. So.. We should know, bbands_stops indicator not just for entries function only..but.. if u seing deeply about this indicator,its same likes standard bollinger bands..I think, probably all trader had known about this basic indicator, i mean how this indicator (bollinger bands) can identified situation of the market.(apadaa aku merepek) Below is briefly illustration of this BBANDS STOPS.

FLAT TREND WITH MACD

This indicator based on MACD. The function of this indicator for ISAKASv2 will helps us to recognise situation of the market trend and will be a part of confirmation entries for ISAKASv2 (**BLUE - UPTREND** **RED - DOWNTREND** **GOLD - FLATTREND**)

ISAKASv2 REBIRTH

SUGGESTION SESSION - EUROPEAN MARKET UNTIL US MARKET CLOSE

TIMEFRAME - 15 MINUTES (INDICATOR SETTINGS)

BBANDS LENGTH (LENGTH - 20 DEVIATION - 1)
FISHER KUSKUS (30 PERIOD)
FLAT TREND (15 (PERIOD), 12,26,9)

RECOMMENDED PAIR - EU , GU , UJPY, UCHF

TIME FRAME - 30 MINUTES

BBANDS_STOP (LENGTH 20, DEVIATION 2)
FISHER KUSKUS (30 PERIOD)
FLAT TREND (30 (PERIOD), 12,26,9)

RECOMMENDED PAIR - EU , GU , UJPY, UCHF, UCAD, GJPY, EJPY, AUDUSD, NZDUSD

ENTRY RULES

BUY - BBands BLUE, ASHI BLUE and STAR BLUE, FLAT TREND BLUE
SELL - BBands RED, ASHI RED and STAR RED, FLAT TREND RED

BRIEFLY ABOUT ENTRIES

The first bbands dot actually turn up follow the movement of the price.. SO.. its quite difficult to make the decision when or which one is the best time for entries. For me actually, the best and safest is looking for the entry 5-10 minutes before the next candle (TF 30) turn up.. OR just making an order after the next candle turn up..

TAKE PROFIT & STOP LOSS

**TP MIN -10 - 15 PIPS
RECOMMENDED SL - 35 - 50**

OR

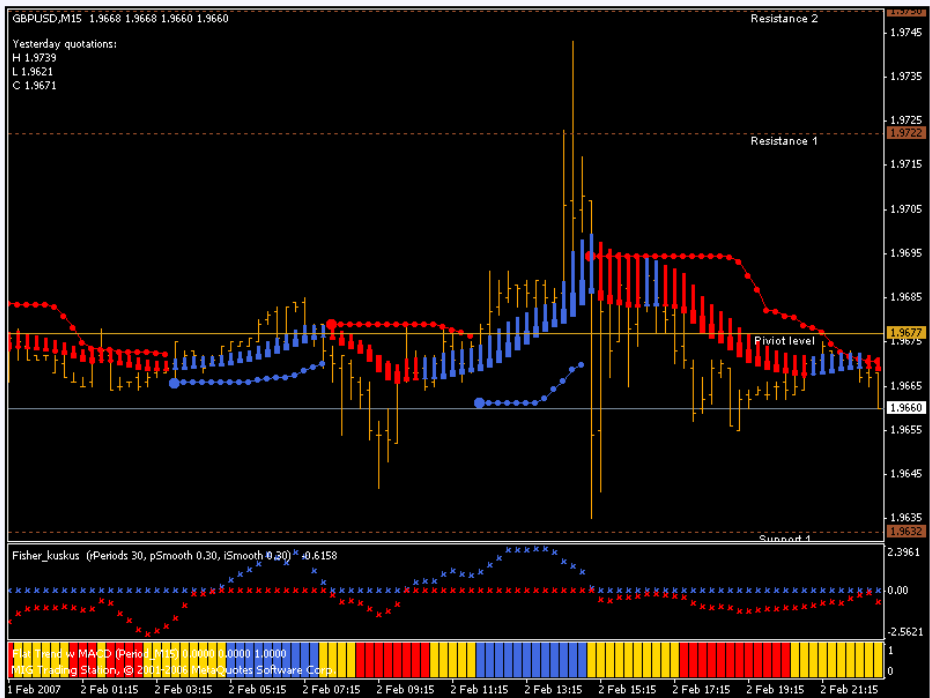

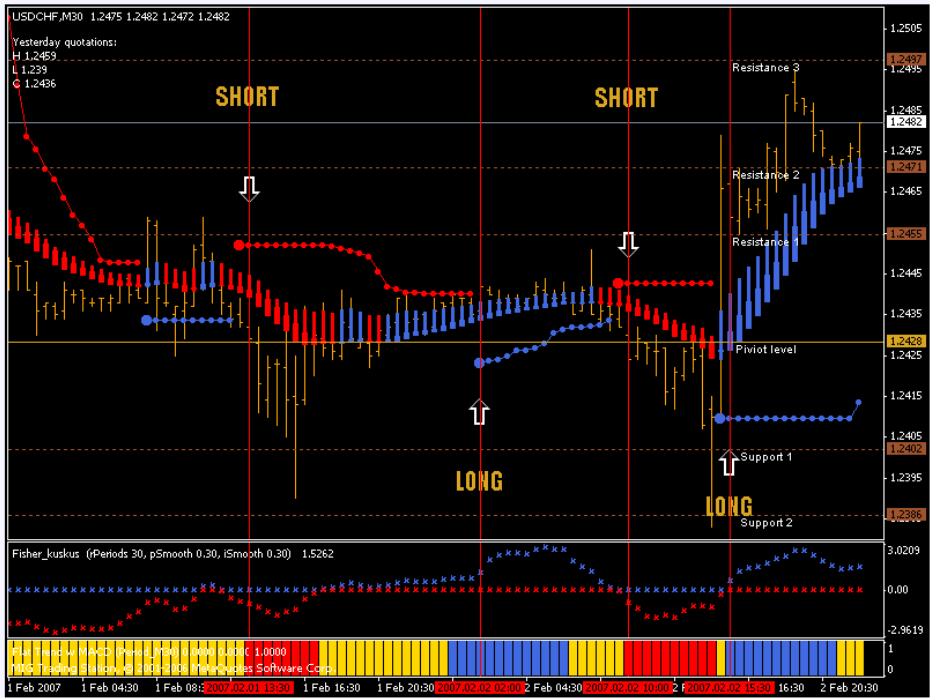

SET TP AND SL REFERS TO FIBO_PIVOT2 LINES

EXAMPLES - BUY SIGNAL IS ON RESISTANCE 1 LINES, SET UR TP AT PIVOT LINES AND STOPLOSS AT RESISTANCE 2

(FIBO_PIVOT LINES IS JUST PROFIT TAKING LEVEL IN ISAKASv2 METHOD)

BRIEFLY ABOUT EXIT TARGET

Maximum pips...All trader hopes to rides until the finishing lines..Its quite hard and risky..U can used ur own indicator and strategies for exit target (HMA, NON LAGMA,PSAR, TRAILING,) Also u can double ur position order.

THANKS FOR ALL INDICATOR CODERS

DISCIPLINE, FOCUS, EMOTION
