Watch the price action, if there is a move south and SUP Zone 2 is reached, either look for retracement back up, or a continuation of the price action into SUP Zone 1. Once in the Zone1 price action will reverse (frequently). Vice versa for the move north.

Some days price action will stay within two zones and won't reach any, these are ranging days.

Following are the Fibo zones for trade setups for June 02 2006.
