Prepared by: Newdigital

All the data was sorted by year and pair so please find the results for 2001 for all the pairs mentioned above (except AUDUSD). We may see from the image below that this portfolio set did 2320 pips in total this year. For risk, drawdown and so on please see the testing results.

In 2002 system did 110 pips only (without AUDUSD).

System did 450 pips in 2003 (without AUDUD as well).

1680 pips for 2004 (see image).

2150 pips in 2005. This year was profitable for this system.

And 1880 pips for half a 2006 year till end of the May).

And the final image is illustrating the yearly profit from this system summarized by year.
